[New To RB 1: The Call Stack](#)

The screenshot shows a web browser window with the title "Action Controller: Exception caught". The address bar displays "http://localhost:3000/tasks/1102". The main content area features a large heading "NoMethodError in TasksController#show". Below this, a message states "undefined method `stringify_keys!' for \"1102\":String". Further down, the Rails root path is shown as "/Users/eifion/rails/apps_for_asciicasts/ep24". There are three links: "Application Trace", "Framework Trace", and "Full Trace". The "Framework Trace" link is active, displaying a call stack of Ruby method calls from the Rails framework and the application's controller. Below the trace, a section titled "Response" shows the headers for the HTTP response, including cookies, content type, and cache control. A horizontal scrollbar is visible at the bottom of the browser window.

Action Controller: Exception caught

http://localhost:3000/tasks/1102

NoMethodError in TasksController#show

undefined method `stringify_keys!' for "1102":String

RAILS_ROOT: /Users/eifion/rails/apps_for_asciicasts/ep24
